ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: POLYMERIZATION INITIATOR SYSTEMS CONTAINING ALUMINUM COMPOUNDS AS CURING
INHIBITORS AND POLYMERIZABLE COMPOSITIONS MADE THEREWITH

(57) Abstract: The invention is directed to a composition comprising an organoborane/amine complex and an effective amount
of an aluminum compound to inhibit curing of the organoborane/amine complex when used as part of a polymerization initiator
system in a polymerizable composition containing one or more monomers, oligomers or polymers having olefinic unsaturation.
The compositions of the invention can be used in polymerizable compositions, adhesive compositions and coatings compositions
containing compounds having moieties which polymerize under free radical polymerization conditions.
